

## **MAIN TO PROVIDE ADVANCE NOTICE OF SOFTWARE CHANGES**

MAIN will provide the users with advance notice of production software changes. Although our goal is to make the software changes on the planned date, there may be some circumstances due to unforeseen problems, where the software changes may be delayed. If this occurs, the MAIN Help Desk will be notified and the Help Desk message will be updated accordingly.

The following software changes will be in production on March 8, 1996.

### **509 SCREEN DID NOT HIGHLIGHT DOCUMENT AGENCY IF BLANK**

The 509 screen was not highlighting the DOC-AGY field when the document agency was blank. This was corrected so that the DOC-AGY field is highlighted when it is left blank on the transaction and the user attempts to save the transaction.

### **47D SCREEN ISSUE DATE FIELD MODIFICATIONS**

The issue date was not properly refreshing for certain payment transactions on the 47D screen. This screen was modified so that the issue date field is refreshed.

### **85 SCREEN SCROLLING PROBLEMS**

The modifications correct scrolling problems that existed. Documents on the 85 screen will now scroll properly using the F8 (Next Page) function key.

### **42 SCREEN MODIFICATIONS**

The 42 screen was modified to select payment transactions with a DMI=L and payment amount equal to zero.
